Project Title: Matcha Website

I'd like to build this site as multiple pages, with a mix of pictures of matcha used in traditional Japanese environments versus in modern culinary environments. Typical site navigation across the top. Maybe include a few cafes where you can get matcha drinks/desserts nearby in St. Louis either on the home page or sources page if you want!

- **Home Page/Introduction + Uses** - Explain what matcha is and some forms of food/drink it can be found in
- **History + Production**
- **Grades** - Summarize the process and define tencha
- **Preparation** - Consider mentioning the types of teaware and health effects
- **Sources** – List sources, including the Wikipedia page, photography, and any other credits that need to be provided.
